Dear Sir/Madam

Greetings, My name is Basilisa Kornel, I earned my diploma in computer engineering from the Dar es Salaam Institute of Technology (DIT) with a 3.9 GPA, I have worked very hard during my education to ensure that I understand every concept and learn how to apply it to address societal issues or improve people's quality of life.

Through this application letter, I would like to put forward my candidacy for this scholarship and use it to fund for my bachelor degree. I intend to get this scholarship to prove myself in the field of engineering but also i want to demonstrate to my nation that computer engineering can improve people's lives.

My sincere goal is to utilize education to transform the world in the most profound way possible, but the cost of doing so is what I need assistance with. I genuinely need the scholarship because I am currently unable to pay my tuition. I come from a low-class home with just one financially unsound father. Since I don't have a source of income, supporting myself is difficult, which makes paying for fees difficult. All of these challenging situations downplay the strength needed to fire my achievement engine. I think that receiving this scholarship will inspire me to pursue my goals.

Finally, I want to emphasize that I'm a very motivated individual and that, if I am awarded a scholarship, I would use it to its fullest potential. Thank you for taking the time to read and I hope to hear from you soon.

Yours sincerely,

Basilisa Kornel sehemu
